Overview of Health Screening Programs

Standard

It includes basic essential tests to check the current health status and early diagnosis.

Premium

Extensive screening exams including CT scans and MRI for diagnosis of major cancers and cardiovascular/cerebrovascular diseases at the early stage.

Intensive

Screening exams focus on specific organs or diseases.

Supplementary Pack

This can be added to your main program for a focused detection of certain organs in addition to main comprehensive check-up.

◆English medical reports and images (CD copy) are provided only for those who have completed the Package Program.

◆Gastroscopy and colonoscopy are only available for ages below 84 and 75 respectively.

Standard

All Standard programs include: Health Questionnaire, Medical Consultation/Lifestyle Assessment, Body Composition Analysis, Blood Pressure, Visual Acuity, Intraocular Pressure, Electrocardiography, Pulmonary Function, Chest X-ray, Blood Test[Anemia, Liver & Renal & Thyroid Function, Lipid, Fasting Blood Sugar, HbA1c, Uric Acid, Electrolytes, HIV, Hepatitis(Type A/B/C), Helicobacter Pylori Antibody, Tumor Markers(Pancreatobiliary, Liver, Colon)], Urinalysis, Stool(Parasite & Occult Blood), Sedative Gastric Endoscopy, Abdominal Ultrasonography

Program	Recommended Age	Male	Female	Test Items
Standard	34≥	980	1,060	· Female : Gynecologic Examination & Consultation, Ovarian Tumor Marker, Cervical Cytologic Test(PAP Smear)
	≥35	1,010	1,130	· Common : Fundus Photography ◆Age ≥50: including Audiometry, excluding Hepatitis A · Male : Prostate Tumor Marker · Female : Gynecologic Examination & Consultation, Ovarian Tumor Marker, Cervical Cytologic Test(PAP Smear), Mammography

Intensive

All Intensive programs include: [Standard Program](#) + Intensive Consultation, Vit. D(blood), Dental Exam/X-ray and Hepatitis A

Program	Recommended Age	Male	Female	Test Items
Cancer	All	2,970	2,940	· Common : Sedative Colonoscopy, Abdominal-pelvic CT, Low Dose Chest CT, Thyroid Ultrasonography, Serum Pepsinogen, Blood Coagulation · Male : Laryngoscopy, Urine Cotinine, Liver Fibroscan, Prostate MRI · Female : Gynecologic & Breast Ultrasonography, HPV DNA Chip, 3D Digital Mammography, Bone Densitometry
Brain	All	2,460	2,590	· Common : Brain MRI/MRA(Including Carotid Artery)
Cardiovascular	All	2,410	2,540	· Common : Coronary 3D CT/Calcium Scoring CT, Treadmill Test, Echocardiography, Carotid Ultrasonography, Microalbuminuria, Arterial Stiffness
Digestive	All	1,910	2,220	· Common : Sedative Colonoscopy, Abdominal-pelvic CT, Serum Pepsinogen, Liver Fibroscan, Blood Coagulation · Female : Gynecologic Ultrasonography
Respiratory	All	1,930	·	· Male : Otorhinolaryngoscopy, Low dose Chest CT, Treadmill Test, Urine Cotinine, Bronchial Provocation(Asthma), FeNO Test
Women	All	·	2,210	· Female : Thyroid & Breast & Gynecologic Ultrasonography, HPV DNA Chip, Female Hormone(4kinds), Bone Densitometry

Premium

All Premium programs include: [Standard Program](#) + Premium Medical Consultation, Nutrition Information, Dental Exam/X-ray, Audiometry, Thyroid Ultrasonography, Urine(Microalbuminuria), Blood[Rheumatoid Factor, Allergy(108kinds), Detailed Lipid Panel, Serum Pepsinogen, Vit. D, Blood Coagulation], Cardiovascular(Treadmill Test, Echocardiography, Arterial Stiffness, Carotid Ultrasonography), Pulmonary(Low Dose Chest CT, Otorhinolaryngoscopy), Gastrointestinal(Abdominal-pelvic CT, Sedative Colonoscopy), Brain MRI/MRA(Including Carotid Artery)

Program	Recommended Age	Male	Female	Test Items
 Premium	35-49	5,300	5,670	<ul style="list-style-type: none"> Male : Male Hormone, Coronary 3D CT/Calcium Scoring CT, Liver Fibroscan, Urine Cotinine Female : Gynecologic Ultrasonography, HPV DNA Chip, Female Hormone(4kinds), Ovarian Tumor Marker(HE4), Detailed Thyroid Hormone Test, Breast Ultrasonography, 3D Digital Mammography, Bone Densitometry
	50-64	5,890	6,620	<ul style="list-style-type: none"> Male : Premium Test Items(Age 35-49) + Prostate MRI Female : Premium Test Items(Age 35-49) + Coronary 3D CT/Calcium Scoring CT, Abbreviated MRI of the Breast
	65-75	6,050	6,420	<ul style="list-style-type: none"> Male : Premium Test Items(Age 50-64) + Bone Densitometry/Thoracic-lumbar Spine X-ray, FeNO Test Female : Premium Test Items(Age 50-64) + Thoracic-lumbar Spine X-ray ◆Excluding HPV DNA Chip, Female Hormone(4kinds)
	≥76	5,780	5,620	<ul style="list-style-type: none"> Common : Premium Test Items(Age 65-75) ◆Excluding Colonoscopy Female : Premium Test Items(Age 65-75) ◆Excluding Abbreviated MRI of the Breast

Supplementary Pack

◆Consultation included in the Packs are conducted by specialized doctors in their respective departments.
◆These Packs are add-on packs to your check-up program.

Category	Program	Price	Test Items	Category	Program	Price	Test Items
 Brain	Stroke	1,994	Consultation, Brain MRI/MRA(Including Carotid Artery), Echocardiography, Carotid Ultrasonography, Microalbuminuria, Detailed Brain(Stroke) Blood Test	 Respiratory	Allergy	628	Consultation, Paranasal Sinus X-ray, Rhinoscopy, Bronchial Provocation(Asthma), FeNO Test, Skin Prick Test(52kinds, can be substituted for 108kinds if needed)
	Arrhythmia	655	Consultation, Echocardiography, Treadmill Test, 3-Day ECG monitoring(MobiCare) ◆75 USD will be charged for switching to 7-Day ECG Monitoring(CardeaSOLO)		Chronic Coughing	648	Consultation, Rhinoscopy, Laryngoscopy, Low Dose Chest CT, Paranasal Sinus X-ray, Bronchial Provocation(Asthma), Urine Cotinine, FeNO Test
	Angina	858	Consultation, Treadmill Test, Coronary 3D CT/Calcium Scoring CT, Echocardiography				

Category	Program	Price	Test Items	Category	Program	Price	Test Items
 Liver	Hepatitis B	364	Consultation, Liver Fibroscan, HBV viral load, HBeAg/Ab, HBsAg Quantitation, Blood Coagulation Test	 Musculo-skeletal	C-L Spine	1,364	Consultation, Cervical and Lumbar Spine MRI, Cervical Spine anterior and lateral X-rays, Lumbar anterior and lateral X-rays
	Hepatitis C	237	Consultation, Liver Fibroscan, Hepatitis C PCR, Blood Coagulation Test		Cervical	1,060	Consultation, MRI & Multiple X-rays of cervical spine
 Kidney	Kidney	639	Consultation, Detailed kidney CT, Microalbuminuria, 24hr Urinalysis, Urine Cytology, Hematuria, Detailed Renal Blood Test		Lumbar	1,158	Consultation, MRI & Multiple X-rays of lumbar spine
					Knee	1,166	Consultation, MRI(Lt. or Rt. knee), X-rays(both knees)
 Eye	Eye Health	388	Consultation, Visual Acuity, Intraocular Pressure, Fundus Photography, Optical Coherence Tomography(OCT), Slit Lamp Biomicroscopy, Refraction		Shoulder	1,082	Consultation, MRI(Lt or Rt shoulder), X-rays(Lt or Rt shoulder)
					Rheumatism	101	Consultation, Detailed Rheumatic Blood Test ◆X-rays can be added after consultation, extra cost for each site(44USD), Blood test is required
 Women	Female Hormone	135	Female Hormone 4kinds[LH, FSH, E2, AMH(Anti-Mullerian Hormone)]	 Prostate	Benign Prostatic Hypertrophy (PM only)	350	Prostate Ultrasonography, Male Hormone, Uroflowmetry, Residual Urine Volume Measurement ◆Available for testing after 1 PM
	Pre-marriage (Female)	653	Breast & Gynecologic Ultrasonography, Rubella(IgG, IgM), Varicella, Female Hormone 4kinds[LH, FSH, E2, AMH(Anti-Mullerian Hormone)]		Prostatic Cancer	641	Prostate MRI, Extensive Prostate Cancer Blood Test
 Abroad	Study Abroad	499	Consultation and Doctor's report, Blood test, Hepatitis(Type A & B & C), MMR(Measles, Mumps, Rubella), Varicella, TB Specific Ag induced Interferon gamma, Tuberculin skin test, Urinalysis, Stool, CD copy of Chest X-ray ◆Test items are adjustable after consultation with a doctor	 Vaccination	Vaccination	Added after consultation	Hepatitis(Type A & B), Seasonal Influenza, Streptococcus Pneumonia, Varicella, Rubella, DPT(Diphtheria, Pertussis, Tetanus), HPV Vaccine(Cervical cancer vaccine), Adult Meningitis, Herpes Zoster, Japanese Encephalitis, Typhoid Fever ◆Reservation required for Japanese Encephalitis, Typhoid Fever

Additional

Category	Program	Price	Test Information	Category	Program	Price	Test Information
 Digestive	Colonoscopy* (sedative)	432	An examination to check the existence of abnormal findings(polyp, cancer) in the whole large intestine area by the endoscope	 Brain	Carotid Ultrasonography	293	An ultrasound exam of the carotid arteries (arteries that ascend from the heart up to the brain) that checks for blood flow and constriction of the blood vessels. Carotid artery stenosis and blood flow impairment can be a cause of cerebrovascular disease.
	Abdominal-Pelvic CT	299	Test to exam intraabdominal organs such as liver, spleen, pancreas, etc.		Brain MRI/MRA	1,280	MRI test to exam brain tissue and vessels ◆Including carotid artery
 Cardiovascular	Treadmill Test	112	Observing the change of the heart condition while running on the treadmill for about 10mins (diagnosing myocardial infarction and angina)	 Respiratory	Low Dose Chest CT (lung)	213	A CT that gives high-resolution pictures of the lungs, allowing detection of abnormal spots within the lungs
	Echocardiography	288	Ultrasonography test to exam heart structure and function	 ENT	Otorhinolaryngoscopy	112	An examination to check the ENT related disease through Endoscope
	Calcium Scoring CT /Coronary 3D CT	416	A test to check coronary related diseases	 Women	Gynecologic Ultrasonography	187	Using ultrasonography, this test is to exam intrapelvic area to see uterus, ovaries and fallopian tube related diseases
	Calcium scoring CT (cardiac CT)	171	The exam to detect ischemic heart disease at an early stage. It measures calcium figure in the coronary artery using a CT scan		Breast Ultrasonography	224	A frequently used examination to evaluate breast abnormalities, such as cyst or breast cancer
 Endocrinology	Thyroid Ultrasonography	203	A painless examination of diagnosing thyroid disease	 Urology	Prostate Ultrasonography	213	A procedure used to examine the prostate gland with ultrasound
					Abbreviated Breast MRI (using contrast)	640	MRI test to see in detail where mammograms and breast ultrasonography cannot be examined ◆Including 3D Digital Mammography

*Polyps larger than 0.7cm(including vascular polyps, infiltrative edges, etc.) may not be removed due to complications(Biopsy may be performed).

Seoul National University Hospital Healthcare System Gangnam Center offers customized programs to provide comprehensive and effective medical examinations considering the individual's medical history, concerns, and risk factors.

Reservation · Telephone: +82-1811-6500, +82-2-2112-5500(Korean), +82-2-2112-5503(International) | Weekdays, 8AM-5PM
Consultation · Internet: <http://en-healthcare.snuh.org>

Result · The consultation will be held after 7-10 days from the examination by the medical experts at SNUH Healthcare System Gangnam Center
Consultation · You will be receiving urgent notice if critical abnormal results are found
· You may check the test results via visit, telephone, or the homepage
· Secondary opinion by specialist will be provided if needed
· Telephone: +82-2-2112-5601 | FAX: +82-2-2112-5590

Location · Address : 38-40th floor, GFC Building 152, Teheran Ro(737 Yeoksam-dong), Gangnam-gu, Seoul, 06236, South Korea
· From Airport(by bus): Bus #6020 will bring you to Yeoksam Station directory from Incheon Airport. The journey will take about 1.5 hours.
· Address Card(Show this address to your taxi driver):

→ 서울특별시 강남구 테헤란로 152 강남파이낸스센터
